EXPERIENCE

Associate Software Engineer

June 2025 – Present

Cargill, Incorporated

Atlanta, GA

- Participate in Cargill's Technology Development Program, gaining experience across software engineering, operations, and digital transformation through rotational assignments.
- Developed audit software that identified and removed over 9,000 stale applications within one year, reducing security vulnerabilities and lowering infrastructure and maintenance costs.
- Contribute to Cargill BioIndustrial's MyCBI project by developing and maintaining software components supporting internal data and document workflows.

TECHNICAL SKILLS

Languages: C/C++, Python, Java, C#, SQL, JavaScript, HTML/CSS

Frameworks: Hugging Face Transformers, React, Node.js, .NET, Windows Forms, Forge

Developer Tools: Google Colab, Git, VS Code, Visual Studio

Libraries: PyTorch, Tensorflow, scikit-learn, PyTesseract, SenseHat, Google ML Kit

EDUCATION

Kennesaw State University

Kennesaw, GA

Bachelor of Science in Computer Science

August 2021 - May 2025

- Concentration in Artificial Intelligence
- GPA: 3.76 / 4.0

PROJECTS / ACTIVITIES

AI Genie | *OpenAI, Python, React Native, NLP*

January 2025 – May 2025

- * Led a 5-person team in developing an AI assistant using OpenAI LLMs and NLP to support customer.
- * Implemented document vectorization to enable retrieval of relevant information from technical documentation.
- * Modified an existing React Native UI and Python backend to integrate AI capabilities into the platform.

Virtual Operating System | *C++*

August 2023 – November 2023

- * Engineered a virtual OS with multi-threading and memory paging support.
- * Created kernel and system programs to manage process control, memory management, and threads.
- * Extended virtual operating system to support multiple CPUs, multithreading, and memory paging.

MBTI personality predictor | *Python/Hugging Face Transformers*

September 2024 – December 2024

- * Developed a personality classification model using a custom-trained DistilBERT model and Kaggle dataset.
- * Implemented a Flask-based chatbot interface for interacting with the model.
